

**Krish-V FMS**  
**Module specific development**

1. **Housemate Users**

- Allow the primary flat owner/tenant to create app logins for other residents.
- Identify each housemate by a unique mobile number.
- The primary member can choose not to send task notifications to a specific housemate.
- Housemates will be treated separately from the primary owner/tenant.
- Housemates can perform all tasks in the app, except creating another housemate account or enrolling in the flat.
- The housemate module will only be available to LIVE-IN customers.
- Both primary members and housemates can modify their mobile numbers within their accounts.
- If the primary flat owner/tenant is removed from the flat, all housemate accounts will be deactivated immediately.
- Data will be saved in the history before removal.

**Settings:**

- Manage multiple users for a single flat.
- Set up task notification delivery to multiple users.
- Configure new users (housemates) across all modules.
- Existing users (mobile numbers) cannot be added as housemates.
- Database Structuring
- App versioning and publishing to app stores.

**Software/App:**

- Krish-V FMS ERP
- Krish-V FMS Mobile App (Android/iOS)
- SmartSerV FM App (Android/iOS)
